

No Need To Stress Over
compliance

compliPOINT Injury/Illness Center

- Report and maintain injury and illness case information
- Track first aid, near miss and information only cases
- Create OSHA 300 log and summary and 301 reports with one click
- Produce dozens of different reports on injuries and illnesses
- You customize pick lists for injury source, body part and many more

The injury illness center has an employee upload tool that allows you to import your employee list with just a few clicks. Your customized pick lists creates clean data so you can print meaningful reports, charts and graphs. You can easily download all your case data into excel anytime you want with a push of a button!
